Power Cable Testing and Diagnostic Services

CE Power Solutions is committed to providing quality technical solutions for Electrical Systems Integrity. CE Power Solutions is the low cost source for Power Cable Testing & Diagnostic Services!

Installation and Repair Conformance

- Cable proof-testing and diagnostics “baseline” services for **new** and **replacement** power cable installations
- 5KV thru 138KV cable applications
- Fault locating
- Pipe-type, conduit, solid-dielectric; direct-buried
- Tan-Delta (Power Factor) testing (off-line)
- Partial-Discharge testing (off-line)
- TDR (Radar) tracing
- VLF Withstand “Proof” testing
- DC Hi-Pot testing
- Polarization index testing (10 Minute Megger)
- Shield and bond testing
- Thermography (Infrared) scans
- Third-party field equipment certification services (NIST)
- Test equipment calibration, glove and stick testing and certification

Engineered Solutions

- Temperature compensated testing
- Detailed graphs
- Installation certification
- Distance verification
- Fault location

CE Power Offers

- Safety-first; professional crews
- Detailed, written reports
- Latest technologies in testing methodology
- Corrective action recommendations
- Professional Engineer (PE) advisement
- Emergency service capabilities

Experience

- Factory trained technicians (HVI, Inc.) in testing underground 69kV and 115kV cable
- 15kV Projects completed for various industrial and institutional facilities
- Completed qty. (6) 35kV Wind Farm Projects completed for GE Energy and Next Era Energy

Always Safe. Always Honest.
