Power Plant Outage Services

CE Power Solutions is committed to providing quality outage maintenance solutions for plant electrical auxiliary systems. CE Power Solutions is the low cost source for electrical testing and maintenance outage requirements.

Testing & Maintenance Services

- Circuit breaker and switchgear testing
- Transformer testing & maintenance
- Iso-phase bus and non-seg bus inspection, clean and test
- TR set oil processing, testing and maintenance
- Gen synch-check relay calibration and testing
- Cable proof-testing and maintenance testing
- Switchgear modifications, retrofill and remote rack installation for arc flash compliance
- Skilled and competent professional NETA qualified technicians
- Doble Engineering client
- Omicron test universe
- Power DB

Reports and Paperwork

- Morning tool box meetings—documented
- Safety checklist—documented
- Electronic reports with data base trending
- Recommendations; information management
- Follow-up repair quotations
- Drafting and “red line” upgrades; drawing certification
- Relay protection coordination
- Power factor correction & capacitor design
- Daily status reports
- Documented processes and procedures
- ISNetworld, MICCS and PICS approved
- DISA and TWIC compliant

Products

- Transformers—dry type, substation and padmount
- Switchgear and circuit breakers—authorized OEM
- Relays, motor protection, advanced metering products for energy management
- Bus systems and switches
- Test equipment—Hi-pots, Meggers, and associated equipment
- Infrared viewing windows
- Immediate access to inventory of surplus equipment

Always Safe. Always Honest.
