

UPGRADE TO A BETTER SOLUTION.

If you have your hands full dealing with inefficiencies, aging equipment, regulations and forced upgrades of existing plants and substations, we can help. CE Power provides full-service electrical engineering capabilities, from design through commissioning, delivered safely and efficiently.

We offer what few can—confidence. With an average 20+ years of deep expertise, our engineers and senior technicians are familiar with the equipment and can leverage multiple solid OEM relationships on your behalf. That means we're not limited to a single manufacturer. Furthermore, we understand the importance of staying on schedule, delivering unmatched performance and unquestionable value.

Think you have a unique challenge? We'll design to your parameters.

SERVICES

- **Customized Engineering**
- **Substation Design**
- **Substation Retrofit and Upgrade**
- **Upgrades – including testing and repairs for 480V to 765kV systems**
- **Protection and Control Design**
- **Switchgear Upgrade and Retrofit Services**
- **Relay Upgrades**
- **Construction Management**
- **Forensic Assessment and Analysis**
- **Design Verification**
- **Online Project Updates and File Sharing**
- **ANSI, IEEE, and NFPA70E-Certified**
